

Bullying

Save A Child's Life By Knowing The Frequently Missed Signs

It is so important to know the warning signs of bullying, because kids won't tell you they are being bullied. Although these signs could signal other issues, you should talk to your child if they display any changes behaviorally, emotionally or you notice a change at school or home. If your child is at immediate risk of harming themselves or others seek help right away.

When talking with your child, don't just ask if they are being bullied. Be subtle with your questions.

Here are some examples:

- You seem to be feeling sick a lot and want to stay home. Please tell me about that.
- Who did you sit by at lunch?
- Do you have any special friends at school/church this year? Who are they?
- I've heard a lot about bullying in the news. Is that going on at your school?
- I'm worried about you. Are there any kids at school who may be picking on you or bullying you?
- Are there any kids at school who tease you in a mean way?
- Are there any kids at school who leave you out or exclude you on purpose?

When you have the conversation with your child please remember to not judge them, listen, and validate their feelings. Do not try to change how they are feeling. Assure them that you love them that this is not their fault and you will help them. Let them know they can talk to you about anything.
